500	"In August 2013 my partner, Charlotte Murray, was diagnosed with a rare brain disease called Frontotemporal Degeneration (FTD). As I wrote in the introduction, this disease has gradually robbed her of her ability to read, write, and speak as well as move around the house without assistance. It has also taken away her interest in and ability to tap dance, play the piano, take photographs, and create artist books. Often this disease affects younger people, so if it is possible to have FTD and say that one is fortunate it is because Charlotte retired early, lived the life she wanted, and was not diagnosed until she was 72 years old. As yet there is no treatment and no cure for this disease. If you would like to learn more, I encourage you to visit the website of the Association for Frontotemporal Degeneration (www.theaftd.org). This book is printed on Epson Premium Presentation Matte Paper using an Epson Stylus Photo 2200 printer with pigment inks. The font is Comic Sans MS"--Colophon.
